komfovent[®]

RHP

Air handling units with heat pump

VENTILATION | HEATING | COOLING | HUMIDITY CONTROL | AIR FILTRATION

Air handling units with integrated heat pump – complete indoor microclimate control

Why to choose Komfovent RHP?

ADDED VALUE TO INDOOR CLIMATE: heating and humidity recovery in winter, cooling and dehumidifying in summer

"ALL INCLUSIVE" SOLUTION: no need for condensing unit, chiller, piping or additional work providing

CONVENIENCE and SAFETY: factory charged by refrigerant, no refrigeration knowledge is needed

ECO-FRIENDLY and PROTECTED: R410A and R134A refrigerant and one circuit charge limits <10 kg

FACTORY TESTED: reliable and convenient PLUG & PLAY installation, commissioning and exploitation

INTELLIGENT CONTROL: clever automatics control algorithms and reliable components ensure safe and efficient equipment operation

SEASONAL EFFICIENCY:

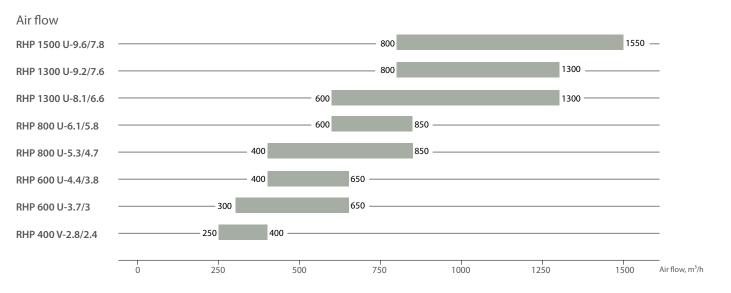

RHP PRO units are equipped with PM motor scroll and rotary compressors controlled by DC inverter driver allowing efficiency operation in part load conditions

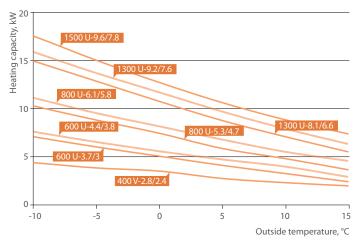

Wide range of Komfovent RHP application possibilities. Residential, public, commercial, industrial application solution

RHP Standard

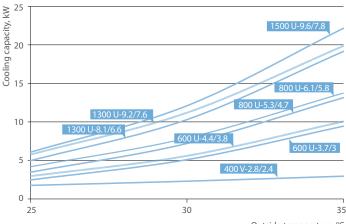

for smaller area premises and required air flows from 250 m³/h to 1500 m³/h

Heating mode

Cooling mode

Wide range of Komfovent RHP application possibilities. Residential, public, commercial, industrial application solution

RHP Pro

for larger area premises and required air flows from 1 000 m^3/h to 25 000 m^3/h

Device management schedule

Variable speed compressors are designed in RHP Pro units. The major benefit of this type of compressor is it's flexibility. The rotation speed of the compressor varies, as the result less energy is used and the minor temperature changes occur in the premises.

Setpoint

Variable speed compressor

	Outdoor Indoor		Size	RHP 10	RHP 20	RHP 30	RHP 40	RHP 50	RHP 60	RHP 70	RHP 80	RHP 90	
			Max air flow, m³/h	2800	4000	6000	8000	11000	15000	18000	22000	25000

RH ¹ , %	40	50	Supply temperature, °C	20									
			Nominal compressor power consumption, kW	2,7	3,9	7,2	8,8	11,4	12,1	16,2	18,2	23,3	
			System EER ^{2,3} , kW/kW	5,3	5,5	6,3	5,6	6,0	7,2	6,8	6,7	6,4	

¹- Conditions according to EN14511

² – Rotary heat exchanger wave size "L"

³ – Rotary heat exchanger + heat pump ⁴ – According to EN 14825 standard

T – temperature, °C

RH – relative humidity, %

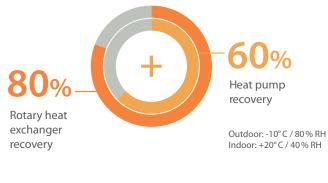

Constant speed compressor

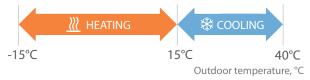

Thermal efficiency over 140%

To reach the maximum efficiency KOMFOVENT RHP units are designed to recover the energy in two steps:

- 1st step recovery
- by enthalpy rotary heat exchanger2nd step recovery
 - by reversible heat pump

Operation range

Optimised and efficient operation principles

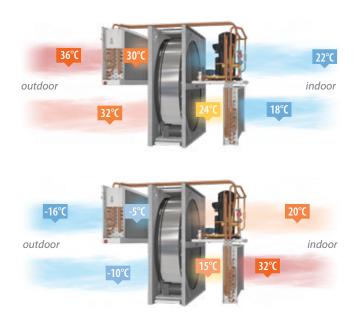

<u>}}}</u>

Cooling mode

Due to cooling recovery by rotary heat exchanger, air temperature after rotor is lower than outside air temperature. Condensation temperature in this case is lower, what results in reduced compressor electricity consumption comparing with outdoor condensing unit.

Heating mode

Highly efficient rotary heat exchanger is used for first stage heat recovery, recovering the biggest part of the heat of extracted air. For second stage heat recovery and supply air temperature control, heat pump is used.

Control system C5

Detailed information for the user

- Air flow indication (m³/h, m³/s, l/s)
- Thermal efficiency of the heat exchanger (%)
- Heat exchanger energy recovery (kW)
- Thermal energy saving indicator (%) .
- Heat exchanger recovered energy counter (kWh) .
- Air heater energy consumption* (kWh)
- Fans energy consumption* (kWh)
- SFP factor of the fans*
- Clogging level of filters* (%)
- * Available in RHP Pro units only

Various operating modes

- 5 different operation modes: Comfort1, Comfort2, Economy1, Economy2, and Special. User may set supply and extract air volumes as well as air temperature for each of mode separately.
- Temperature control modes: Supply air / Extract . air / Room / Balance. Possibility to select which temperature to be maintained.
- Flow control modes: Constant Air Volume, Variable Air Volume or Directly Controlled Volume.
- Universal operating schedule with up to 20 events, for which of them user can assign weekday(s) and one of five operation modes.
- Holliday scheduling allows the user to change . operation mode or switch off the air handing unit at some dates of the year. Up to 10 events are possible.

Extended control possibilities

- Controlling up to 30 units connected into a network from one panel.
- Ability to connect the controller to the Internet network and manage it via a standard internet browser without any accessories.
- Ability to control the unit not only by a control panel or a computer, but also by different external devices (switch, timer, etc.) and systems (e.g. the smart house system).

"Komfovent C5" app

Application is designed to control air handling units with integrated C5 control system. User-friendly interface is intuitive for both experienced

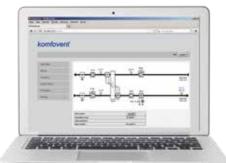

and less experienced users. As the application fully replicates a control panel functions, you will have an access to all monitoring and

control possibilities available in the control panel.

The application is available on Google play and App store.

komfovent[®]

lodbus

Air handling unit operation can be monitored and

controlled via web browser. Implemented Modbus and

BACnet protocols allow easy integration of air handling

units to any desired Building Management Systems.

Integrated web server
